

Propinsi Jawa Barat secara geografis terletak di antara 5°50' - 7°50' Lintang Selatan dan 104°48' - 108°48' Bujur Timur, dengan batas-batas wilayahnya:

- sebelah utara, berbatasan dengan Laut Jawa dan DKI Jakarta
- sebelah timur, berbatasan dengan Propinsi Jawa Tengah
- sebelah selatan, berbatasan dengan Samudra Indonesia
- sebelah barat, berbatasan dengan Propinsi Banten

Kondisi geografis Jawa Barat yang strategis merupakan keuntungan bagi daerah Jawa Barat terutama dari segi komunikasi dan perhubungan. Kawasan Utara merupakan daerah berdataran rendah, sedangkan kawasan selatan berbukit-bukit dengan sedikit pantai serta dataran tinggi bergunung-gunung ada di kawasan tengah.

Selain itu, Jawa Barat yang memiliki lahan yang subur yang berasal dari endapan vulkanis serta banyaknya aliran sungai menyebabkan sebagian besar dari luas tanahnya digunakan untuk pertanian. Hal ini menyebabkan Propinsi Jawa Barat ditetapkan sebagai lumbung pangan nasional. Jawa Barat yang beriklim tropis dengan curah hujan rata-rata 161,0 mm, sedangkan rata-rata hari hujan untuk tahun 2004 ini adalah 16 hari.

*Geographically, Province of Jawa Barat lies between 5°50' - 7°50' South Latitude and 104°48' - 108°48' East longitude; it is bounded :*

- *on the north by Java Sea and Special Region of Jakarta*
- *on the east by Province of Central Java*
- *on the south by Indonesian Ocean and*
- *on the west by Province of Banten*

*The strategic geographic position of Jawa Barat Province has many advantages for this regional, especially from transportation and communication point of view . The north part of West Java is flat land area, while hilly area with a few shores in the south and mountainous area in the central part.*

*Apart from that, Jawa Barat has fertile area which comes from volcanic deposit and that possesses many rivers across so that the most of land are suitable for agriculture. Therefore, this area is intended as National Food Stock Area. This condition is also supported by tropical climate with high rainfall, that is average 161.0 mm, while the average rainy days in 2004 is 16 days.*

Kesejahteraan penduduk merupakan sasaran utama dari pembangunan di berbagai daerah. Untuk itu pemerintah telah melaksanakan berbagai usaha dalam rangka memecahkan masalah kependudukan.

### 3.1. Penduduk

Jumlah penduduk Jawa Barat pada tahun 2004 mencapai 38,47 juta orang (tanpa Banten). Pada tahun 2001 baru mencapai 36,08 juta orang, meningkat lagi menjadi 36,91 juta orang di tahun 2002, sedangkan tahun 2003 menjadi 37,98 juta orang. Dibandingkan tahun sebelumnya, pertumbuhan penduduk Jawa Barat sebesar 1,29 persen.

Pada tahun 2004 penduduk terbanyak di Jawa Barat ada di Kabupaten Bandung, yaitu sebesar 4,09 juta orang kemudian diikuti oleh Kabupaten Bogor 3,80 juta orang sedangkan jumlah penduduk terkecil pada tahun ini sebanyak 0,16 juta orang berada di Kota Banjar.

Jumlah rumah tangga pada tahun 2004 di Jawa Barat mencapai 10 196 064 rumah tangga. Tertinggi berada di wilayah kabupaten Bandung, yaitu 1 058 816 rumah tangga, kabupaten Bogor sebesar 904 608 rumah tangga dan ketiga terbesar adalah kabupaten Sukabumi sebesar 584 384 rumah tangga.

Di tahun 2004, kepadatan penduduk Jawa Barat mencapai 1 314,09 orang per kilo meter persegi. Kota Bandung masih

*The main aim of development in all regions in Indonesia is to achieve the welfare of population. Therefore, the government had made a lot of efforts in order to solve the Indonesian population problems.*

### 3.1. Population

*Number of Jawa Barat Population in 2004 reached 38.47 million (without Banten). In 2000 the number of population just reached 36.08 million peoples, and increased to 36.91 million peoples in 2002, while in 2003 became 37.98 million peoples. Compared to last year, Jawa Barat population growth was 1.29 percent.*

*In year 2004, the most populated area in Jawa Barat were Bandung Regency which had 4.09 million peoples, followed by Bogor Regency which had 3.80 million peoples; Moreover, the least populated area was Banjar City which had 0.16 peoples.*

*In year 2004, the number of household in Jawa Barat province reached 10 196 064 households. The highest number was in Bandung Regency, which had 1 058 816 households, Bogor Regency had 904 608 households. The third highest number was in Sukabumi regency which had 584 384 households.*

*In 2004, population density of Jawa Barat reached 1 314.09 peoples per kilometers square. The City of Bandung*

merupakan daerah terpadat, yaitu sebesar 13 296,55 orang per kilometer persegi, sedangkan yang terendah kabupaten Ciamis hanya sebesar 666,02 orang per kilo meter persegi.

Pada bab ini juga disajikan data proyeksi penduduk yang dihitung berdasarkan hasil Sensus Penduduk 2000 (SP 2000) menurut kelompok umur dan kabupaten/kota sampai dengan tahun 2010.

### 3.2 Tenaga Kerja

#### a. Komposisi Penduduk Usia Kerja

Penduduk Usia Kerja didefinisikan sebagai penduduk yang berumur 10 tahun dan lebih. Mereka terdiri dari "Angkatan Kerja" dan "Bukan Angkatan Kerja". Proporsi penduduk yang tergolong "Angkatan Kerja" adalah mereka yang aktif dalam kegiatan ekonomi. Keterlibatan penduduk dalam kegiatan ekonomi diukur dengan porsi penduduk yang masuk dalam pasar kerja yakni yang bekerja atau mencari pekerjaan. Tingkat Partisipasi Angkatan Kerja (TPAK) merupakan ukuran yang menggambarkan jumlah angkatan kerja untuk setiap 100 tenaga kerja.

Kesempatan kerja memberikan gambaran besarnya tingkat penyerapan pasar kerja, sehingga angkatan kerja yang tidak terserap dikategorikan sebagai penganggur. Pada tahun 2004, jumlah angkatan kerja di seluruh propinsi Jawa

*was still the highest densely populated region with 13 296.55 peoples per kilometers square, while The Regency of Ciamis was the lowest densely populated area with only 666.02 peoples per kilometers square.*

*This chapter also presents the population projection from 2000 to 2010 as data was supplied from 2000 Population Census, and it is compiled by the group of age and by regency/ city.*

### 3.2 Manpower

#### a. Composition of Working Ages

*Working age is defined as population who are 10 years old or older. They are classified as "Economically Active Group" and "Not Economically Active Group". The "Economically Active Group" is classified as those who took part in economic sector, either in having or looking for a job. Manpower who was economically active is called labor force. Labour Force Participation Rates (LFPRs) is the number of population who was classified as labor for for every 100 manpowers.*

*The employment oppurtunity indicates the market contribution in empowering people in Jawa Barat. Therefore, the labor force who was not actively working because the job market was not available is considered unemployee. In 2004, the number of labour force in Jawa Barat province was*

Barat sebanyak 16 636 057 orang. Yang aktif bekerja sebanyak 87,75 persen, dan yang menganggur sebesar 12,25 persen.

#### **b. Komposisi Penduduk Yang Bekerja**

Proporsi pekerja menurut lapangan pekerjaan merupakan salah satu ukuran untuk melihat potensi sektor perekonomian dalam menyerap tenaga kerja. Hal lain dapat pula mencerminkan struktur perekonomian suatu wilayah.

Sebagian besar penduduk Jawa Barat yang bekerja pada tahun 2004, memiliki jenis pekerjaan utama sebagai tenaga produksi, tenaga usaha pertanian dan tenaga usaha penjualan. Persentase penduduk yang bekerja pada sector tersebut masing-masing 33,39, 29,45, dan 21,91 persen. Sedangkan yang bekerja sebagai tenaga ahli dan profesional masih sangat sedikit. Tenaga profesional hanya berjumlah 3,81 persen, tenaga kepemimpinan sebanyak 0,53 persen, dan anggota TNI 0,66 persen.

Pertumbuhan tenaga kerja yang kurang diimbangi dengan pertumbuhan lapangan kerja akan menyebabkan tingkat kesempatan kerja cenderung menurun. Jumlah penduduk Jawa Barat yang mencari kerja pada tahun 2004 berjumlah 4 219 610. Dari total jumlah tersebut, pencari kerja lulusan SLTA sebanyak 69,3 persen, lulusan Sarjana sebanyak

16 636 057 persons. The actively working manpower was 87.75 percent, and the number of unemployed was 12.25 percent.

#### **b. Composition of Working Population**

The main occupation by type of economic sector is one of the measurement to see the potency of economic sector in absorption of labor force. It can also show the economic structure in a particular region.

The type of primary jobs of most Jawa Barat population in year 2004 was production, agriculture, and sales worker. The percentage of population work in these fields were 33.39, 29.45 and 21.91 respectively. While, expert or professional was still very few. Professional was only 3.81 percent, manager was 0.53 percent, and member of Indonesian defense (TNI) was 0.66 percent.

Furthermore, the growth of labor force which unbalanced with the growth of working opportunities caused the decreasingly of employment rate. In 2004, the number of job seekers in Jawa Barat was 4 219 610. From this total, 69.3 percent was senior high school graduate, 11.6 percent was university graduate, 10.2 percent was junior high

11, 6 persen, SLTP 10,2 persen, lulusan Sarjana Muda 5,3 persen, dan lulusan SD 3,6 persen. Dapat disimpulkan bahwa dari semua pengangguran terbuka yang ada di Jawa Barat, sebagian besar berpendidikan rendah.

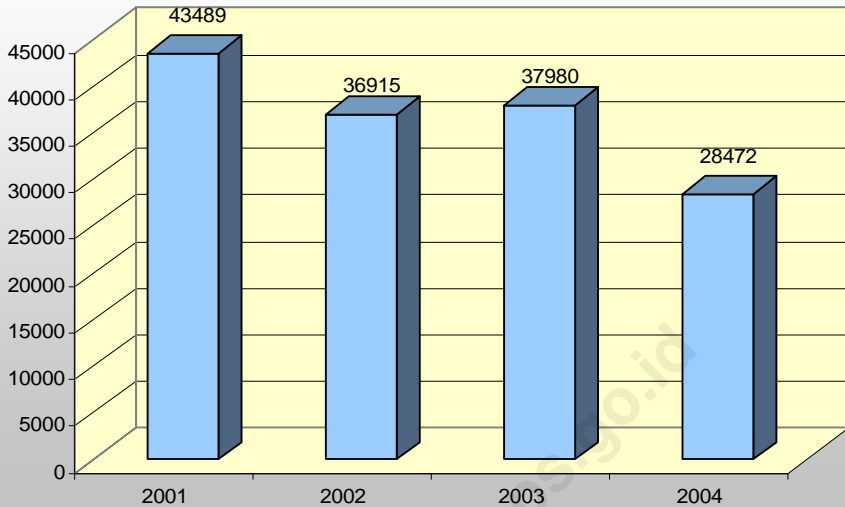

Tabel 3.2.14 dan 3.2.15 memperlihatkan perbandingan antara jumlah pencari kerja laki-laki dan wanita. Dapat dilihat bahwa pencari kerja laki-laki lebih banyak dari perempuan.

*school graduate, 5.3 percent was diploma graduate, and the rest 3.6 percent was primary school graduate. It indicates that most of the unemployment in Jawa Barat were low educated.*

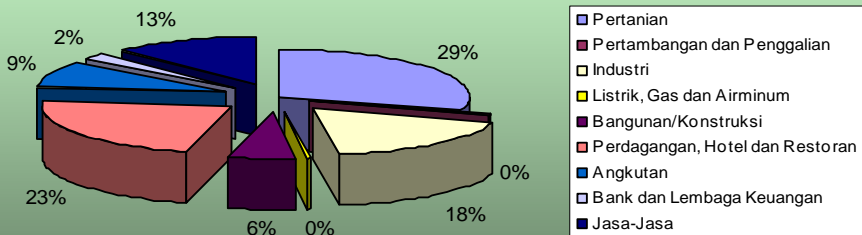

*Table 3.2.14 and 3.2.15 compared the gender of the job seeker. Number of male unemployments were more than female.*

Kebijaksanaan pembangunan di bidang sosial menyangkut berbagai aspek memang sangat kompleks. Selain berdampak terhadap ekonomi juga dalam sosial politik masyarakat. Bahkan keberhasilan pembangunan bidang sosial dapat dievaluasi dan dijadikan sebagai indikator tahun-tahun selanjutnya.

Keberhasilan pembangunan bidang sosial tidak hanya dapat dilihat dari bentuk fisik saja, namun harus dilihat secara keseluruhan, yaitu dari segi fisik dan mental. Segi fisik meliputi pembangunan sarana dan prasarana misalnya gedung atau penunjang lainnya sedangkan segi mental meliputi kondisi mental penduduknya

Salah satu upaya untuk mencapai delapan jalur pemerataan yang mencakup usaha/pemerataan dalam rangka pembangunan sosial budaya, Pemerintah Daerah Tingkat I Jawa Barat telah mengupayakan berbagai usaha meliputi bidang pendidikan, kesehatan dan keluarga berencana, agama dan kehidupan sosial lainnya.

Bidang Pendidikan, Kesehatan dan Keluarga Berencana, Agama dan Kehidupan Sosial lainnya merupakan beberapa aspek yang ditampilkan dalam publikasi ini.

*The development Policy in social sector related to several aspects which are too complicated. It affects not only to economic but also to socio-politic in society. More over, success of social development can be evaluated and can be used as indicator in future years.*

*The success of socio cultural development is not only seen on physical result but also in a whole aspect of life. For example, the physical aspect includes infra-structures and supra-structures development such as building, education system, transportation system etc. Meanwhile, the spiritual aspect includes the way of life of society.*

*Regional Government of the first stage autonomous of Jawa Barat has striven for various efforts on several development issues including education, health and family planning, religion and other social life to make socio-cultural development properly distributed.*

*In this publication, many aspects of Education Sector, Family Planning, Religion and Other Social life are presented.*

#### 4.1 Pendidikan

Peningkatan Sumber Daya Manusia (SDM) merupakan modal untuk penggerak pembangunan yang pada gilirannya dapat meningkatkan kesejahteraan disamping Sumber Daya Alam. Kebijakan pemerintah di dunia pendidikan sangat menentukan arah dan mutu pendidikan itu sendiri. Untuk mengambil kebijakan yang tepat sasaran pemerintah sangat membutuhkan data-data dunia pendidikan yang akurat. Pada bab ini disajikan data jumlah mahasiswa, murid, jumlah sekolah, dan staf pengajar.

Pada tahun ajaran 2004/2005, rasio perbandingan jumlah murid terhadap jumlah guru untuk Sekolah Dasar, Sekolah Lanjutan Tingkat Pertama, Sekolah Lanjutan Atas serta Sekolah Lanjutan Tingkat Atas Lanjutan adalah sebagai berikut 31,43 17,85 16,55 dan 14,75.

#### 4.2. Kesehatan dan Keluarga Berencana

Pembangunan kesehatan harus selalu dilakukan mengingat jumlah penduduk yang selalu bertambah dari tahun ke tahun. Upaya pemerintah untuk meningkatkan derajat dan status kesehatan penduduk dilakukan antara lain dengan meningkatkan fasilitas dan sarana kesehatan. Pembangunan bidang kesehatan bertujuan agar semua lapisan

#### 4.1 Education.

*Human Resource Development is one of main factors in supporting national development in order to improve people welfare besides exploiting the natural resource. The government regulation in education sector will show the vision and the quality the education itself. The government needs an accurate and precise data in order to decide an appropriate national regulation in education. This chapter will show the number of university students, regular school student, number of school, and the teacher.*

*In the year of 2004/2005, the ratio between number of students to number of teacher in primary, elementary, high school and vocational senior high school were 31.43 17.85 16.55 and 14.75 consecutively.*

#### 4.2. Health and Family Planning

*The health development will be continuously improved as the number of population will always increase. In line with government policies imposed on other sector as an effort to increase health quality of society and number of medical personnel. The Development of health sector is aimed at improving health*

masyarakat dapat memperoleh pelayanan kesehatan secara mudah, merata dan murah.

Pada tahun 2004 jumlah Rumah Sakit di Jawa Barat adalah 152 buah dengan 15 498 tempat tidur. Puskesmas dan Balai Pengobatan mencapai 5 585. Jumlah ini mengalami kenaikan dibandingkan tahun sebelumnya.

Sedangkan jumlah tenaga medis berkurang dibandingkan tahun berikutnya. Pada tahun 2004, jumlah dokter umum mencapai 1425 dan dokter gigi mencapai 626.

Pemberian imunisasi kepada Balita seperti BCG, Tetanus, Campak, Polio, Hepatitis (HB3) mengalami penurunan dibandingkan dengan tahun sebelumnya.

Jumlah Bidan puskesmas dan desa sebesar 5 902 orang dengan rincian 2 412 orang bidan puskesmas dan 3 490 orang bidan desa. Sedangkan jumlah persalinan yang ditolong oleh tenaga kesehatan sebesar 496 684 persalinan.

### 4.3 A g a m a

Kehidupan beragama yang diatur dalam UUD 1945 Pasal 29 dan Sila Pertama Falsafah Negara, yaitu kehidupan beragama dikembangkan dan diarahkan untuk peningkatan akhlak demi kepentingan bersama untuk membangun masyarakat adil dan makmur. Hasil yang telah dicapai dalam bidang agama,

*condition of the society by providing health facility with easier, convenient, and cheaper access.*

*In 2004 the number of Hospital 152 units with 15 498 beds. Number of Public Health Center and Medical Clinic reach 5 585 units. This number increased compared to the previous year.*

*On the other hand, number of medicinal decreased compared to the previous year. In 2004, number of general practitioner reached 1425 and number of dentist reached 626.*

*The giving of immunization to baby less than 5 year (Balita) as BCG, DPT, Campak, Polio, and IMR also decreased compared to the previous year.*

*The number midwife is 5 902, classified into 2 412 public health center midwife and 3 490 local midwife operating in villages. Total number of birth delivery by medical personals is 496 684.*

### 4.3 Religion

*The Constitution of 1945 and the first principle of the Five Philosophical Principles administer religious life and belief in the one Supreme God. Social behavior in any activity has been developed to improve religious life. The purpose of development in Religious sector is for welfare society.*

disajikan sebagai data keagamaan meliputi jumlah tempat peribadatan, guru agama dan data penunjang lainnya.

Pada tahun 2004 jumlah tempat peribadatan umat Islam tercatat 110 021 buah yang terdiri dari 42 605 buah mesjid, 86 671 buah langgar dan 23 350 mushola.

Source : Public Work Service Cipta Karya Jawa Barat Province

Pembangunan ekonomi pada sektor pertanian dimaksudkan untuk meningkatkan pendapatan petani dan mensukseskan pemerataan pembangunan pedesaan. Hal ini didasarkan pada fakta bahwa dalam struktur perekonomian Jawa Barat sektor pertanian merupakan sektor dominan ke tiga terbesar setelah industri dan perdagangan.

Upaya yang sudah dijalankan pemerintah kearah itu adalah dengan menerapkan program intensifikasi, ekstensifikasi, diversifikasi dan rehabilitasi.

Ulasan pada bab ini akan dikelompokkan dalam sub sektor sebagai berikut:

- 5.1 Pertanian Tanaman Pangan
- 5.2 Perkebunan
- 5.3 Kehutanan
- 5.4 Peternakan
- 5.5 Perikanan

### 5.1 Pertanian Tanaman Pangan

Tanaman pangan meliputi tanaman bahan makanan, sayur-sayuran dan buah-buahan. Tanaman Bahan Makanan terdiri dari jenis padi-padian, jagung, umbi-umbian dan kacang-kacangan. Data tanaman bahan makanan dirinci menurut luas panen, hasil per hektar dan produksi. Luas lahan dengan menggunakan irigasi teknis terus meningkat dibanding tahun sebelumnya dan mencapai angka 383 261 Ha atau sekitar 41.20 persen dari luas sawah lahan total.

*Economic development, especially in agriculture sector is mainly designed in order to increase the farmer welfare and to succed the villages development. This is based on the fact that agriculture sector is the third largest dominant sector in Jawa Barat after industrial sector and trade.*

*Several things has be done in order to pursue this purpose such as applying intensification, ekstensification, diversification and rehabilitation.*

*The explanation in this chapter will be grouped in sub sector as follows:*

- 5.1. Foods Crops Agriculture
- 5.2. Estate Crops
- 5.3. Forestry
- 5.4. Animal Husbandry
- 5.5. Fishery

### 5.1. Foods Crops Agriculture

*Food crops coverage foodstuff crops, vegetables and fruits. The foodstuff consists of cereal kinds, corn, all kinds of tubers and legumes. Data of foodstuff crops are divided into harvested area, result per hectares and production. The land area which using technical irrigation increased compared to the previous year and the area reached the number that was 383 261 Ha or about 41.20 percent from total of wet land area.*

Sedangkan luas lahan kering bila dilihat menurut penggunaannya, yang utama adalah jenis tegal/kebun mencapai 612 151 Ha atau 23,35 persen dari jumlah lahan kering, disusul oleh Hutan Negara 577 110 Ha (22,41 persen) sedangkan yang paling kecil adalah lahan yang sementara tidak diusahakan yaitu 10 534 Ha (persen).

Pada tahun 2004 luas panen padi mengalami kenaikan yang signifikan dibanding tahun 2003 demikian pula hasil produksinya. Untuk padi sawah luas panen dan produksinya mengalami kenaikan masing-masing sebesar 15,2 dan 11,62 persen. Sementara itu padi ladang luas panennya dan produksinya mengalami penurunan masing-masing sebesar 7,73 dan 12,38 persen. Sedangkan hasil per hektar mengalami penurunan yaitu sebesar 2,15 kuintal per hektar untuk padi sawah dan 1,34 kuintal per hektar untuk padi ladang.

Pada tahun 2004 rata-rata terjadi peningkatan pada luas panen sayur-sayuran di Jawa Barat terutama pada bawang daun, bawang merah, kentang, kubis, petsai, wortel, bayam, tomat dan kacang merah. Kenaikan luas panen berimbas pada kenaikan jumlah produksinya. Produksi sayur-sayuran yang meningkat ini dimungkinkan oleh meningkatnya pengetahuan petani tentang teknik bercocok tanam, yaitu dengan mengembangkan pola tanam intensifikasi dan diversifikasi.

*Mean while, if the dry land area was classified by its utility; the land used for garden reached 612 151 Ha or 23.35 percent from total of dry land area. It was followed by state forest 579 536 Ha (22.41 percent). While the least was used for temporary fallow land that reached 10 534 Ha ( 0.4 percent).*

*In 2004, the harvested area of paddy increased significantly compared to 2003 and the production decreased as well. Harvested area of wet land paddy and the production increased 15.2 and 11.62 percent consecutively. Meanwhile, harvested area of dry land paddy and the production decreased 7.73 and 12.38 percent consecutively. However, productivity per hectares decreased 2.15 quintal per hectares for wet land and 1.34 quintal per hectares for dry land.*

*On the average, there is an increase number in vegetable harvested area in Jawa Barat compared to year 2004. It especially happened for spring onion, onion, potatoes, cabbage, Chinese leaves, carrot, spinach, tomatoes and kidney beans. The increase on harvested area would bring impact on vegetable production. In addition, the increase on vegetable production was supported by farmer knowledge of how to farm better such as how to use the intensification and diversification system.*

Sedangkan produksi sayur-sayuran yang mengalami penurunan adalah kacang panjang, bayam, ketimun, cabe, tomat, terong, kangkung, bawang putih, mlinjo, dan petai.

## 5.2 Perkebunan

Sub sektor perkebunan mempunyai peranan yang cukup besar dalam pengembangan sektor pertanian. Sejalan dengan peningkatan pembangunan di sektor pertanian maka pembangunan sub sektor perkebunan juga mengalami peningkatan. Salah satu tujuan utama pembangunan di sub sektor ini adalah meningkatkan mutu dan produksi.

Propinsi Jawa Barat memiliki perkebunan yang dikelola oleh Perkebunan Besar Milik Negara dan Swasta serta Perkebunan Rakyat. Komoditi potensialnya adalah teh, kelapa, kopi, cengkeh dan karet.

Untuk Tahun 2004 areal Perkebunan Besar Milik Negara mengalami sedikit kenaikan tetapi produksinya mengalami penurunan. Sedangkan areal Perkebunan Swasta dan Perkebunan Rakyat mengalami sedikit penurunan tetapi produksinya mengalami kenaikan.

## 5.3 Kehutanan

Stabilitas sumber daya alam terjaga dengan baik dikarenakan adanya peranan yang sangat penting dari kawasan hutan.

*On the other hand, the production of vegetables decreased on yard long beans, spinach, cucumbers, chilies, tomatoes, eggplants, swamp cabbage, garlic, mlinjo, and petai.*

## 5.2. Estate Crops

*Estate Crops is one sub sector which has big contribution in developing agriculture sector. Therefore, improving agriculture sector consequently will bring progress to estate crops sector. One purpose of this sector development is to increase the production quality and quantity.*

*The estate crops in Jawa Barat Province are organized by large state-owned estate, private enterprises, and small holder establishment. The most potential estate crops commodities are tea, coconut, coffee, clove and rubber.*

*In 2004, the area National Large Estate increase slightly while the production decreased. On the other hand, the area Private Large Estate and Smallholder decreased slightly while the production slightly increased.*

## 5.3 Forestry

*Forest has a crucial role for keeping the stability of Natural Resources. Function of Forest can be classified into*

Selain itu ditunjang pula oleh fungsi hutan sebagai hutan lindung, hutan produksi, hutan suaka dan wisata serta hutan cadangan.

Berdasarkan data dari Perum Perhutani Unit III Jawa Barat, pada tahun 2004 luas kawasan hutan sebesar 638 802 Ha. Dibandingkan tahun yang lalu jumlah ini berkurang sebesar 10 305,3 Ha atau sebesar 1.59 persen. Jumlah ini terus mengalami penurunan setiap tahun tahunnya. Adapun produksi kayu tebangan sebesar 196 350 m<sup>3</sup> dengan luas areal sebesar 9 425,04 Ha. Adapun jenis kayu tebangan yang paling banyak produksinya adalah kayu jati sebesar 101 397 m<sup>3</sup>. Sementara itu, produksi hasil hutan bukan kayu yang paling banyak di Jawa Barat adalah getah pinus dengan jumlah produksi 5 970 531 ton, dan luas areal sebesar 12 598,42 Ha.

#### **5.4. Peternakan**

Peranan sub sektor peternakan dalam bidang pertanian cukup besar menempati posisi kedua terbesar setelah tanaman bahan makanan. Salah satu tujuan di sub sektor ini adalah meningkatkan populasi dan produksi ternak dalam usaha memperbaiki ternak dalam usaha memperbaiki gizi masyarakat. Hal yang pokok tentu saja adalah untuk menghasilkan pendapatan peternak terutama yang berdomisili di pedesaan. Jenis ternak yang diusahakan di Jawa

*four classification, that were protected/conservation forest, production forest, national park, tourism forest, and reserve forest.*

*According to data from Public Corporation of Forestry Unit III Jawa Barat, the forest area in 2004 was 638 802.62 Ha. Compared to the previous year, this area decreased 10 305.3 Ha or around 1.59 percent. However, the area continuously decreased every year. The wood production was 196 350 m<sup>3</sup> while the area of wood was 9 425.04 Ha. Teak is the largest type of timber product. The production was 6 882.57 m<sup>3</sup>. Meanwhile, pine sap is the largest type of non timber forestry production in Jawa Barat. The production was 5 970 531 tons, and the area was 12 598.42 Ha.*

#### **5.4. Animal Husbandry**

*The role of animal husbandry has an important part in agriculture. The development of animal husbandry sub sector is to increase production livestock as an effort to improve society nutrition. Beside that, it is also to enhance farmers income in rural community. Big cattle (cow, buffallo and horse), small cattle (sheep, goat, and pig) and poultry (domestic/buras chicken, layer, broiler and duck) are kind of live- stocks in Jawa Barat Province.*

Barat berupa ternak besar, kecil dan unggas.

Pada tahun 2004 jumlah ternak sapi sebesar 331 907 ekor, kerbau 149 960 ekor, kuda 14 242 ekor, kambing 1 144 102 ekor, domba 3 529 456 ekor dan babi 8 092 ekor. Sementara itu, jumlah ternak yang dipotong adalah ternak sapi 282 353 ekor, kerbau 11 994 ekor, kambing 101 157 ekor, domba 542 693 ekor dan babi 25 581 ekor.

Unggas yang dipelihara adalah jenis ayam buras, ras petelur, ras potong dan itik. Dibandingkan tahun sebelumnya, jumlah unggas dan hasil produksi unggas di Jawa Barat mengalami sedikit penurunan dibanding tahun sebelumnya.

Produksi kulit ternak pada tahun 2004 mengalami penurunan seperti kerbau, kambing dan domba. Produksi kulit sapi dan produksi susu mengalami kenaikan dibanding tahun sebelumnya.

## 5.5. Perikanan

Di Jawa barat prospek perikanan tiap tahunnya hampir memperlihatkan angka yang cukup menjanjikan. Pada tahun 2004, total produksi ikan hasil penangkapan dan budidaya sebesar 441 584,22 ton, dengan nilai produksi sebesar 1 232 848 836 juta rupiah. Luas areal tambak ikan adalah 51 765,64 Ha, luas kolam ikan adalah 19 444,32 Ha, luas keramba adalah 134 567 Ha dan luas area sawah yang dijadikan tempat

*In year 2004, populations of cows were 331 907, population of buffalo was 149 960, population of horse was 14 242, population of goat was 144 102, population of sheep were 3 529 456 and population of pig was 8 092. Mean while, number of slaughtered cows was 282 353, buffalo was 11 994, goat was 101 157, sheep was 542 693, and pig was 25 581.*

*The kind of Jawa Barat poultries were local hen, layer, broiler, and ducks. The number of poultries and the production of poultry meats decreased slightly compared to last year.*

*In year 2004, the production of leather decreased slightly, such as buffalo, goat, and sheep. However, the production of cow leather and the production of milk increased slightly compared to the previous year.*

## 5.5. Fishery

*The prospect of Fishery in Jawa Barat Province continuously showed a relatively brighter future every year. In 2004, the quantity of fish production was 441 584.22 tons, and the value of fish production was 1 232 848 836 millions rupiahs. The area of brackish water pond, pond, cage, and paddy field for fishery purpose was 51 765.64 hectares, 19 444.32 hectares, 134 567 hectares, and 21 950.85 hectares respectively.*

pemeliharaan ikan adalah 21 950,85 Ha.

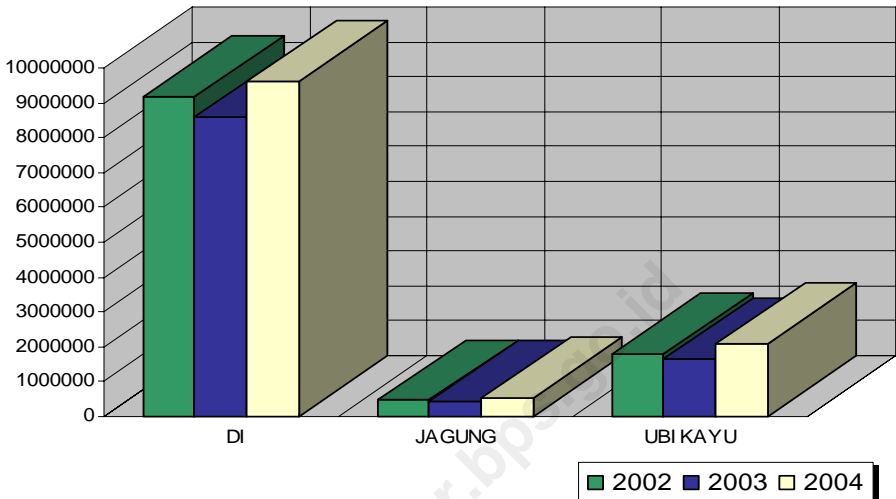

Pada tahun 2004, jumlah perahu/kapal penangkapan ikan sebanyak 17 901 buah, dimana 93,65 persen adalah jenis motor tempel. Sedangkan rumah tangga perikanan di Jawa Barat sebesar 427 371 rumah tangga. Rumah tangga terbanyak mengusahakan budidaya kolam sebesar 63,96 persen. Rumah tangga yang melakukan penangkapan ikan di laut sebesar 7,02 persen, dan melakukan penangkapan di perairan umum sebesar 11,43 persen.

*In 2004, number of marine fisheries catching was 17 901. Furthermore, out board motor was the most around 93.65 percent. The fishery household in Jawa was 427 371. The largest percentage was the household with fresh water pond for 63.96 percent. Household with marine fisheries was 7.02 percent, while household with open water was 11.43 percent.*

## 6.1 Industri Pengolahan

Kontribusi terbesar dalam pembangunan ekonomi di Jawa Barat secara makro pada tahun 2003 didominasi oleh Sektor Industri Pengolahan. Oleh karena hampir 60 persen Industri pengolahan berlokasi di Jawa Barat, maka perekonomian nasional sangat dipengaruhi oleh kinerja industri di daerah ini. Bahkan sektor industri pengolahan, merupakan lapangan usaha terbesar kedua menyerap tenaga kerja setelah Pertanian. Untuk itu, kebijakan pembangunan dalam pengembangan sektor ini, sangatlah tepat, walaupun akhir-akhir ini sektor industri pengolahan terhempas akibat krisis ekonomi yang melanda per-ekonomian nasional.

Pada umumnya Industri di Jawa Barat berorientasi ekspor, sehingga secara makro dapat meningkatkan penerimaan negara dalam bentuk devisa. Namun karena industri yang dibangun bukan berbasis ekonomi rakyat atau paling tidak menggunakan bahan baku produksi dalam negeri, maka sektor ini rentan terhadap krisis yang melanda dunia bisnis di tanah air.

Dalam pengumpulan data Statistik Industri, yang dimaksud dengan sedang dengan jumlah pekerja

## 6.1. Manufacturing Industry

*Contribution of manufacturing sector to national economic is very huge, included in Jawa Barat. Since almost 60 percent of manufacturing industries are located in Jawa Barat, the performance of Jawa Barat Manufacturing Industry will affect performance of national economic. In Jawa Barat Economic Structure, Manufacturing Industry Sector has the largest contribution and then followed by Agriculture. On the contrary, manufacturing industry sector was the second economic sector that employs labor force after agriculture. Therefore, development policy in this sector is very significant, even though at this sector is falling down by economic crisis which hurled national economic.*

*Generally, manufacturing industry in Jawa Barat was designed as export oriented industry, so that can increase government revenue in foreign exchange. However since this industry basically is not people economic oriented or at least use domestic raw material product, then this sector susceptible to crisis which hurled business world in this country.*

*In Collecting Data of Industrial Statistics, definition of large scale or more, medium scale industry is*

industri besar adalah dengan jumlah pekerja 100 orang atau lebih, industri antara 20 sampai dengan 99 orang. Industri kecil mempunyai mempunyai pekerja antara 5 sampai dengan 19 orang dan perusahaan yang mempunyai pekerja kurang dari 5 orang industri kerajinan rumah tangga.

Berdasarkan hasil survei industri besar/ sedang tahun 2003 di Jawa Barat terdapat 4 860 buah perusahaan dengan jumlah tenaga kerja terserap sebanyak 1 130 921 orang dan apabila dibandingkan dengan tahun sebelumnya maka jumlah tenaga kerja yang terserap industri besar / sedang mengalami penurunan sebesar 1,61 persen.

Upah tenaga kerja selama tahun 2003 mencapai 14 593 490 juta rupiah. Dibandingkan dengan tahun 2002, mengalami kenaikan sebesar 2 289 815 juta rupiah atau sekitar 18,61 persen.

Nilai output perusahaan industri besar dan sedang tahun 2003 naik menjadi 195 213 763 juta rupiah (4,24 persen), sedangkan nilai input mencapai 119 002 833 juta rupiah atau turun 0,73 persen. Dengan demikian nilai tambah atas dasar harga pasar sektor industri besar dan sedang tahun 2003 naik menjadi 76 210 930 juta rupiah (13,09 persen).

*industry is manufacturing establishment with total number of worker 100 persons manufacturing establishment with number of worker between 20 to 99 persons. Small scale industry is manufacturing establishment with number of worker between 5 to 19 persons and establishment which has number of worker below 5 person is categorized as household industry.*

*According to the result of large/ medium scale Industry Survey Year 2003, in Jawa Barat existed 4 860 enterprises with the number of worker about 1 130 921 thousands persons and compared to previous year number of large/medium scale industry decreased about 1.61 percent.*

*Worker salary during 2003 reached 14 593 490 million rupiahs. Compared to year 2002 increased about 2 289 815 billion rupiahs at about 18.61 percent*

*Output Value of large/medium manufacturing establishment year 2003 increased to 195 213 763 million rupiahs (4.24 percent). On the other hand, input value reached 119 002 833 million rupiahs or it decreased 0.73 percent. Nevertheless, added value of large/medium scale industry at market prices year 2002 increased to 76 210 930 billion rupiahs (13.09 percent).*

## 6.2. Penggalian

Pengambilan air bawah tanah secara berlebihan dapat mengakibatkan terganggunya ekosistem alam Indonesia. Oleh sebab itu volume air yang diijinkan untuk diambil dan jumlah air yang diambil harus terus dipantau untuk menjaga keseimbangan ekosistem.

Pada tahun 2004 jumlah ijin usaha pertambangan di Jawa Barat mencapai 512. Hanya 329 usaha yang sedang aktif atau sekitar 64,26 persen dan sisanya 183 atau sekitar 35,74 persen tidak aktif

Jenis bahan galian tambang yang paling banyak dieksploitasi di Jawa Barat adalah batu kapur, tanah liat dan andesit. Pada umumnya, produksi bahan galian tambang mengalami peningkatan dari tahun 2002 sampai 2004.

## 6.3. Listrik dan Air Minum

Sebagian besar dari kebutuhan listrik baik industri maupun untuk rumahtangga di Jawa Barat dilayani oleh Perusahaan Umum Listrik Negara dan sebagian lainnya di luar PLN. Sumber tenaga listrik Perusahaan Umum Listrik Negara berasal dari Pembangkit Listrik Tenaga Air (PLTA) dan Pembangkit Listrik Tenaga Diesel (PLTD).

## 6.2. Quarrying

*Exploiting Natural Water Resource overly can damage the nature of ecosystem in Indonesia. Therefore, government has to regulate the volume of water taken and these numbers has to be observed in order to balance the ecosystem itself.*

*In year 2004, the total of mining establishment permit reaches 512 numbers. Only 329 establishments are active, which is around 64.26 percent, and the rest 183 or around 35.74 percent is not active.*

*However, the kinds of mining material mostly exploited in Jawa Barat are limestone, kaolin, and andesit. On general, the production of mining material has been increased since the year of 2002 up to 2004.*

## 6.3. Electricity and Water Supply

*In Jawa Barat, the State-owned Electricity Company (PLN) supplies most of electricity demand either for manufacturing establishments or for households, and only a small portion supplied by non PLN. The Source of electric power of state-owned Electric Company (PLN) came from hydro electric power generator (PLTA) and Diesel electric power generator (PLTD).*

Kebutuhan akan energi listrik dewasa ini semakin meningkat karena terus berkembangnya pembangunan sektor industri dan terus bertambahnya pengguna rumah tangga setiap tahunnya. Bahkan pemerintah tidak mampu untuk mensupply permintaan konsumen terutama dunia usaha. Melalui pinjaman luar negeri maka dibangunlah beberapa pembangkit tenaga listrik baik yang bersumber dari tenaga uap, air, diesel bahkan nuklir, yang dikelola oleh perusahaan swasta.

Tahun 2004 jumlah pelanggan sebesar 6 145 591 dengan daya tersambung 9 070 313 583 kwh dan energi listrik yang terjual yaitu sebesar 21 771 355 006 ribu kwh. Akan tetapi 24 156 196 900 ribu kwh yang siap dijual, hanya 22 017 790 318 ribu kwh yang dijual, sisanya sebanyak 2 138 406 582 kwh susut atau hilang (8,85 persen).

Jumlah desa yang dialiri listrik pada tahun 2004 sebanyak 5 562 desa dengan dengan daya tersambung 3 992 MVA.

Kebutuhan air bersih semakin dirasakan oleh masyarakat perkotaan. Hal ini merupakan dampak dari tingginya kepadatan penduduk daerah perkotaan yang dibarengi dengan langkanya sumber air bersih. Di samping itu, manajemen perusahaan daerah sebagai pengelola ternyata selama ini kurang profesional sehingga sebagian besar dalam operasionalnya mengalami inefisiensi.

*The needs of electricity increased sharply since development of manufacturing industry sector increased and the number of households increased every year. The government even can not supply all the consumer needs especially demand from manufacturing industry. Therefore, by using the foreign loan the government built new electric power generator such as, hydro electric power generator (PLTA), Nuclear Electric Power Generator (PLTN), Gas Electric Power Generator (PLTG).*

*In 2004, total customers was 6 145 591 with power installed 9 070 313 583 kwh, and the total electricity sold was 21 771 355 006 thousand kwh. However, the total of ready sold energy was 24 156 196 900 thousand kwh. There was only 22 017 790 318 being sold, and the rest 2 138 406 582 was lost (8.85 percent).*

*The number of villages that have electricity in year 2004 was 5 562 villages with connected power 3 992 MVA.*

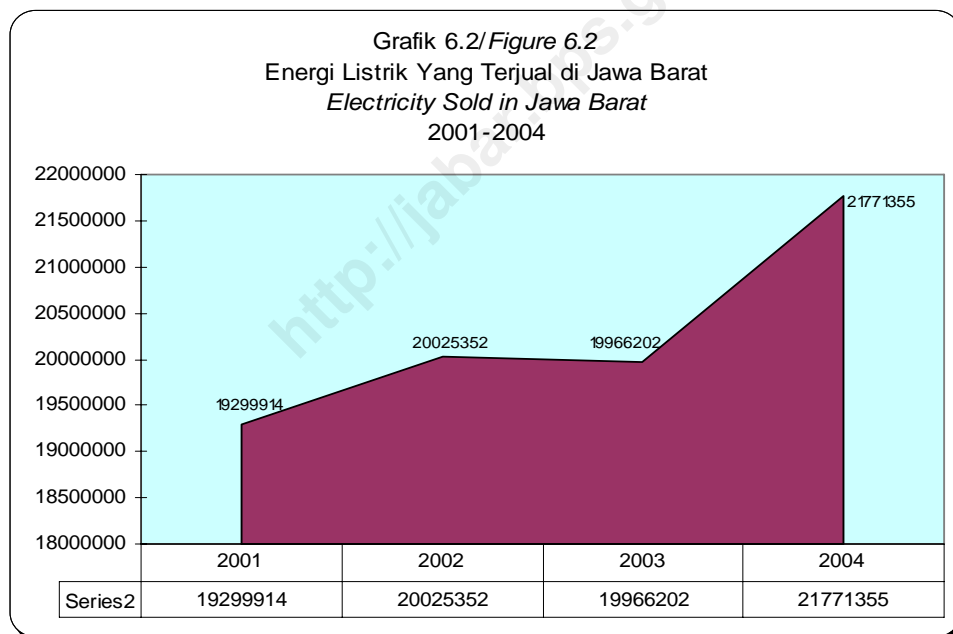

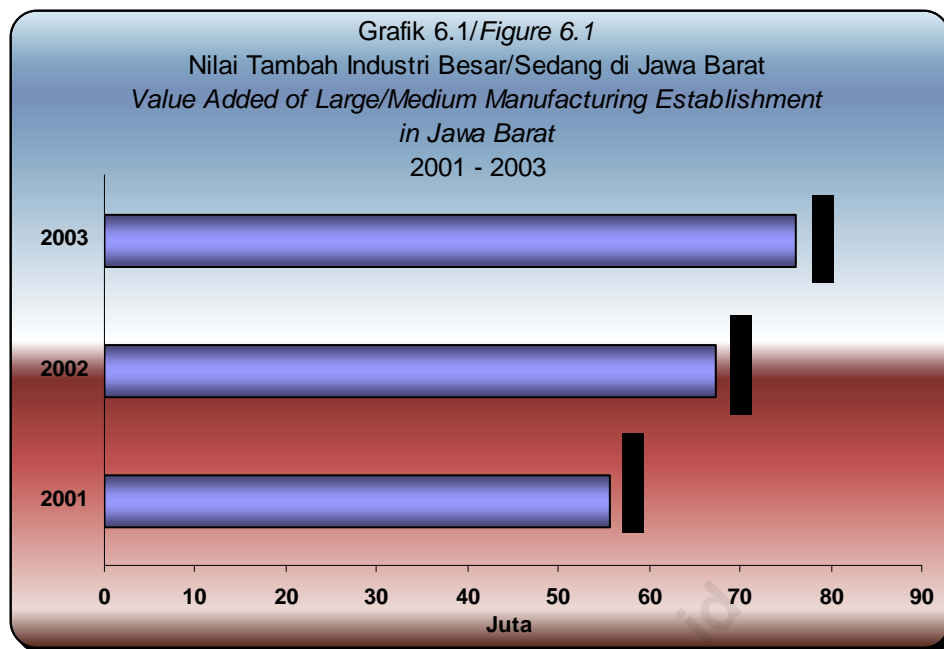

*At this moment, urban societies rely heavily on clean water supply. It is an impact of highly populated density in urban area together with scarcity of fresh water resources. Beside that, the management of regional enterprises as manager during this time was so unprofessional. This reason has caused inefficiency in the company operation.*

Di samping itu sumber air bersih ini menjadi masalah utama terutama daerah yang tata ruangnya tidak konsisten sehingga terjadi pencemaran lingkungan dan dapat membawa dampak terhadap kesehatan masyarakat. Pada tahun 2004 jumlah perusahaan air minum di Jawa Barat sebanyak 20 perusahaan dengan kemampuan kapasitas produksi efektif sebesar 12 413 lt/detik. Sedangkan jumlah kapasitas produksi potensial adalah sebesar 14 702 lt/detik.

Produksi air bersumber dari sungai, danau, mata air, artesis dan lainnya. Sedangkan produksi air terbesar bersumber dari sungai sebesar 208,2 juta m<sup>3</sup>. Pendistribusian air disalurkan ke berbagai golongan konsumen antara lain rumah tangga, niaga/perdagangan dan industri, badan sosial, umum, instansi pemerintah dan lainnya.

*The fresh water resources became main problem prominently in region that has inconsistent space regulation so that happened environment pollution and could bring impact to society health. In year 2004 the number of water supply enterprises is 20 with total effective production capacity 12 413 lt/seconds. However, the number of potential capacity production was 14 702 lt/second.*

*The water resources are from rivers, lakes, spring water, artesian and others. Most of the water taken is from rivers, about 208.2 million m<sup>3</sup>. The clean water is distributed to all kinds of costumers , i.e. house holds, trading and industries, social institutions, public facilities, government institution and others.*

## 8.1 Perhubungan Darat

Perhubungan darat merupakan prasarana pengangkutan yang penting untuk memperlancar kegiatan perekonomian. Dengan makin meningkatnya usaha pembangunan maka akan menuntut peningkatan pembangunan jalan untuk memudahkan mobilitas penduduk dan memperlancar lalu lintas barang dari satu daerah ke daerah lain. Di samping itu perhubungan darat merupakan salah satu sektor yang cukup besar perannya karena kontribusinya untuk menembus isolasi suatu daerah untuk pemerataan pembangunan seluruh daerah.

Di Jawa Barat peranan perhubungan darat cukup dominan terutama untuk menyalurkan produk industri berbagai daerah terutama di Pulau Jawa, dan bahan baku yang melalui pelabuhan laut Tanjung Priok. Selain itu, perhubungan darat sangat dibutuhkan dalam melayani kebutuhan masyarakat terutama menggerakkan perekonomian di pedesaan.

Panjang jalan di Jawa Barat pada akhir tahun 2004 adalah 23 017 km. Jika dirinci menurut jenis permukaan jalan maka sepanjang 17 988 km atau sebesar 78,15 persen sudah beraspal, 2 586 km atau 11,24 persen berkerikil, sisanya sepanjang 2 442 km atau sebesar 10,61 persen masih batu dan belum dirinci.

## 8.1 Road Transportation

*One of the important infrastructures supporting economic activities is the availability of road transportation. Improvement in all aspects of economic development requires more improvement in transportation, especially in road development. This development is intended to facilitate population mobility and distributive trade from one region to another region. Moreover, road transportation sector plays an important role in Jawa Barat development by helping to reach an isolated area to get equal share in all sectors of national development.*

*The role of road transportation in Jawa Barat is very dominant, the main functions of road transportation are to distribute manufacturing product to several region in Java Island and to supply raw material from Tanjung Priok seaport. Beside that, road transportation is needed to fulfill population need especially to accelerate rural economic.*

*The length of roads in Jawa Barat at the end of 2004 was 23 017 km. According to type of surface, 17 988 km or 78.15 percent was asphalted, 2 586 km or 11.24 percent was graveled, and the rest was still rocky and unspecified for about 2 442 km or 10.61 percent.*

Dari seluruh jalan yang ada di Jawa Barat, hanya 7 292,33 km (31,68 persen) dalam kondisi baik, sepanjang 7 057,63 km (30,66 persen) dalam kondisi sedang sedangkan sisanya sepanjang 8 667,73 km (37,65 persen) dalam kondisi rusak dan rusak berat. Dibandingkan tahun yang sebelumnya, kualitas jalan raya sedikit mengalami peningkatan.

Lalu lintas Angkutan Penumpang Kereta Api di Wilayah Jawa Barat tiap bulannya pada tahun 2004 dapat kita amati pada tabel 8.1.5. Jenis sarana angkutan ini relatif murah dan banyak penggunaannya. PT KAI sendiri setiap tahunnya berusaha meningkatkan pelayanan terhadap konsumennya.

Pada tahun 2004 jumlah penumpang yang menggunakan jasa angkutan ini sebanyak 117 287 102 orang dengan nilai pendapatan sebesar 339 174 403 rupiah. Rata-rata tiap bulan penumpang 9 773 925 orang. Jika dibandingkan dengan tahun sebelumnya, jumlah penumpang mengalami sedikit penurunan tetapi dari segi pendapatan mengalami kenaikan.

Sedangkan lalu lintas Barang dengan menggunakan angkutan Kereta Api di Wilayah Jawa Barat pada tahun 2004 ini sebesar 193 583 ton dengan pendapatan sebesar 4 759 602 juta. Dibanding tahun 2003, volume mengalami kenaikan sebesar 31,91 persen dan pendapatan mengalami kenaikan sebesar 37,50 persen.

*From all roads in Jawa Barat, only 7 292.33 km (31.54 percent) in good condition, 7 057.63 km (30.66 percent) was in moderate condition and the rest was in damage and seriously damaged conditions for about 8 667.73 km (37.65 percent). Overall, the quality of road slightly increased compared to last year.*

*The traffic of rail way transportation passenger in Jawa Barat every month for the year 2004 can be in table 8.1.5. This kind of transportation is relatively cheap and more popular. PT KAI itself tries to improve its service to its consumer every year.*

*In year 2004, the number of passengers using this transport services was about 117 287 102 peoples, with total revenue around 339 174 403 rupiahs. Average per month was 9 773 925 passengers. Compared to last year, the total passengers slightly decreased, but the total revenue slightly increased.*

*However, freight traffics using railway transportation in Jawa Barat at 2004 is about 193 583 tons with total revenue about 4 759 602 millions. Compared to the year 2003, the volume significantly increased by 31.91 percent while the revenue significantly increased by 37.50 percent.*

## 8.2. Perhubungan Udara

Pengembangan angkutan udara sangat terkait dengan kegiatan pariwisata, karena kondisi alam di Jawa Barat pada umumnya sangat diminati oleh wisatawan dalam dan luar negeri. Jawa Barat merupakan alternatif tempat wisata bagi penduduk DKI Jakarta dan sekitarnya untuk berakhir pekan. Pada umumnya angkutan udara di Jawa Barat masih kurang berkembang dibandingkan dengan propinsi-propinsi lain di Indonesia. Tetapi sejak tahun 2004 penerbangan internasional telah mulai aktif kembali dari Husein Sastranegara airport setelah sejak lama kurang aktif.

Walaupun perhubungan udara prasarananya tidak sebaik Soekarno Hatta, namun untuk melayani jalur penerbangan antar daerah sudah cukup memadai. Beberapa jalur penerbangan domestik terus dibuka dan ditambah untuk menghubungkan Jawa Barat dengan ibukota propinsi lain di pulau Jawa.

Jumlah penumpang domestik yang berangkat melalui Bandara Husein Sastranegara, dari bulan Januari sampai dengan Desember 2004 tercatat sebanyak 182 460 orang dan yang datang sebanyak 162 770 orang. Dibandingkan tahun 2003, angka ini mengalami kenaikan yang cukup tinggi yakni masing-masing sebesar 42,56 dan 32,67 percent.

## 8.2. Air Transportation

*Air transportation development is closely related with tourism activities. In general, domestic and foreign tourists are very attracted to see the natural views of Jawa Barat. Jawa Barat has become an alternative for tourist object for DKI Jakarta population and surrounding area. Overall, air transportation in Jawa Barat did not show significant improvement compared to other provinces in Indonesia. Since 2004, Husein Sastranegara airport has been reopened for international flights since it has not been active for quite long.*

*Even though the quality of airport in Jawa Barat is not the same as quality of Sukarno Hatta Airport, but the airports in Jawa Barat is able to serve domestic flights well. New routes have been opened and new flights have been added in order to connect Jawa Barat with other cities or capital cities of other provinces in Jawa Island.*

*Number of domestic passengers departed from Husein Sastranegara Airport, since January until December 2004 was 182 460 persons, and number of passengers arrived was 162 770 persons. Compared to 2003, these numbers had been increased significantly around 42.56 and 32.67 percent consecutively.*

Banyaknya penerbangan yang berangkat dari Bandara Husein Sastranegara pada tahun 2004 tercatat sebanyak 5269 dan datang sebanyak 5255.

Sedangkan banyaknya penumpang yang berangkat dari Bandara Penggung Cirebon dari Januari sampai dengan Desember 2004 sebanyak 391 orang dan yang datang sebanyak 393 orang. Sedangkan banyaknya penerbangan yang berangkat 124 dan yang datang sebanyak 166.

Perhubungan laut tidak begitu berperan di Jawa Barat, karena hanya beberapa pelabuhan yang melayani angkutan laut. Pelabuhan Tanjung Priuk di DKI Jakarta melayani sebagian besar ekspor dan impor Jawa Barat. Pelabuhan laut lainnya di Jawa Barat juga dapat melayani Ekspor dan impor, termasuk perdagangan antar pulau.

Pelabuhan Cirebon melayani bongkar muat barang baik Pelayaran Luar Negeri juga Pelayaran Dalam Negeri. Untuk lebih jelasnya data per bulan dapat dilihat pada tabel 8.2.4.

### 8.3. Pariwisata

Salah satu sektor yang dapat diandalkan sebagai sumber devisa negara adalah sektor Pariwisata. Jawa Barat ditetapkan sebagai salah satu tujuan Wisata, maka kegiatan pariwisata di daerah

*The number of departures in Hussein Sastranegara airport in 2004 was 5269 and number of arrival was 5255.*

*At the same time, number of passengers departed from Penggung-Cirebon airport from January to December 2004 was about 391 persons and the number of passengers arrived was about 393 passengers. The number of flights departed from Penggung-Cirebon airport at year 2004 was 124 and the number of arrival was 166.*

*The contribution of sea transportation to Jawa Barat economic is not significant, since only several sea-port gives sea transportation. Tanjung Priok sea-port in Jakarta mostly serves export and import need in Jawa Barat. However, Jawa Barat seaports still function as export-import route especially to support trade between small islands.*

*Port of Cirebon not only for loading and unloading Ocean going, but also inter-island or domestic sea transport For clearly, data per month can be seen in table 8.2.4 .*

### 8.3. Tourism

*Since Jawa Barat is one of tourism destination region, then tourism activity in this region is very suitable to back up regional development planning. It means,*

ini cukup potensial untuk menunjang pembangunan daerah. Paling tidak, dapat diandalkan sebagai sumber pendapatan negara.

Jumlah kunjungan wisatawan ke obyek wisata di Jawa Barat pada tahun 2004 sebanyak 6 192 847, dimana 209 255 (3,38 persen) merupakan kunjungan wisatawan mancanegara dan 5 983 592 (96,62 persen) wisatawan nusantara. Kunjungan wisatawan mancanegara terbanyak terjadi di kota Bandung dan kabupaten Bogor. Sedangkan kunjungan wisatawan nusantara paling banyak terjadi di Kota Bandung dan Kabupaten Tasikmalaya. Kota Bandung merupakan obyek wisata untuk berbelanja dan pantai Pangandaran yang terletak di Kabupaten Ciamis populer untuk keindahan alam dan pantainya.

#### **8.4. Pos dan Telekomunikasi**

Peranan pos dan telekomunikasi dalam struktur perekonomian Jawa Barat memang tidak begitu dominan, tetapi dalam menunjang pembangunan di daerah ini cukup besar. Tanpa adanya kontribusi telekomunikasi, dunia usaha di daerah ini tidak semaju seperti sekarang.

Berbagai usaha pemerintah untuk memperlancar pelayanan komunikasi, salah satunya peningkatan mutu layanan jasa Pos. Namun tidak dapat dipungkiri dengan maraknya pengembangan

*tourism revenue can be claim as one source of development budget.*

*The number of tourist visits to tourism objects in Jawa Barat in year 2004 was 6 192 847, in which 209 255 number (3.38 percent) was foreign tourist visit, and 5 983 592 (96.62 percent) was domestic tourist visit. The most favorite objects for foreign tourist were Bandung City and Bogor Regency. Mean while, the most favorite objects for domestic tourist were Bandung City and Ciamis Regency. Bandung City is famous as the shopping place, while Ciamis Regency has Pangandaran Beach which famous for the beautiful beach and nature.*

#### **8.4. Post and Telecommunication**

Contribution of Post and Tele communication Sector to Economic of Jawa Barast is not significant. In spite of that, the function of post and telecommunication as special tools for business communication has played a main role.

*Generally speaking, Government has tried to improve quality of Post services. However, the incredible progress of information technology has a big impact*

teknologi informasi, pemakaian jasa Pos semakin berkurang. Sedangkan pemakaian internet dan telekomunikasi yang menggunakan teknologi *wireless* terus berkembang pesat.

Pada tahun 2004, jumlah surat yang dikirim lewat Pos dalam negeri untuk jenis surat Biasa mengalami sedikit kenaikan (8,91 persen), sedangkan surat Tercatat mengalami penurunan yang cukup besar (30,98 persen). Sedangkan surat yang dikirim ke luar negeri untuk jenis biasa mengalami penurunan sebesar 42,30 persen, dan surat tercatat mengalami kenaikan yang sangat besar (535,26 persen).

Untuk meningkatkan jasa layanan telekomunikasi, PT. Telkom telah banyak melakukan terobosan dalam memperlancar arus informasi dan memperluas jangkauan jasa telekomunikasi ke pelosok tanah air. Tujuannya adalah untuk meningkatkan kemampuan/efisiensi dan keandalan dalam memberi jasa telekomunikasi dan informasi kepada masyarakat dengan memanfaatkan kemajuan teknologi.

Hal ini dapat dilihat dari sarana telepon, seperti telepon umum pelanggan sebesar 2 473 unit, dan telepon umum tunggu 19 170 unit. Pulsa telepon umum koin sebesar 24 143 612 dan telepon umum pelanggan sebesar 23 366 673.

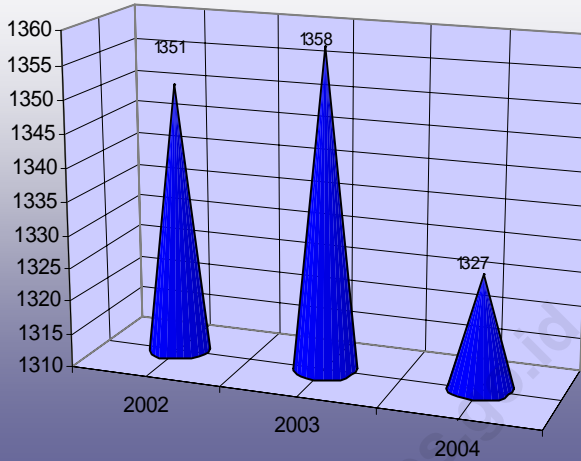

*because people tend not to use airmail service any longer. On the other hand, internet and wireless telecommunication technology had made a significant progress.*

*In year 2004, the number of domestic mails for ordinary type increased slightly (8.91 percent), but registered type decreased significantly (30.98 percent). On the other hand, the number of mail sent abroad for ordinary type decreased ( 42.30 percent), and registered type increased significantly (535.26 percent).*

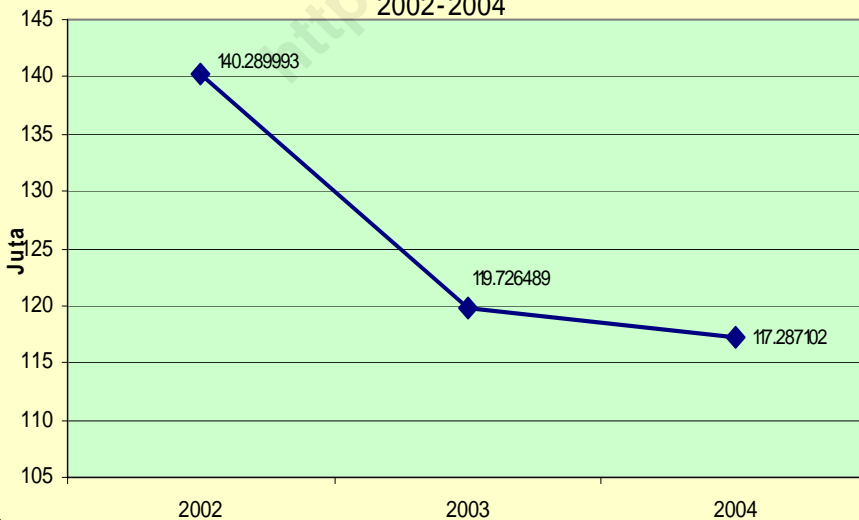

*To improve telecommunication services, PT. Telkom has done some innovation to speed up the pace of information and enlarge the network of telecommunication services to all region in Indonesia. The objective is to enhance capability/efficiency and reliability of telecommunication and information services to our society by making use of advance technology.*

*The number of customer public phone was 2 473 units, and the number of waiting public phone was 19 170 units. The number of pulse for coin public phone was 24 143 612, and the number of units for customer public phone was 23 366 673.*

## 9.1. Keuangan Daerah

Penerimaan pemerintah daerah merupakan salah satu faktor utama untuk membiayai pembangunan. Penerimaan pemerintah daerah bersumber dari pendapatan asli daerah berupa pajak daerah dan bantuan pemerintah pusat. Dengan terbatasnya penerimaan daerah maka bantuan pusat berupa dana perimbangan masih cukup dominan dalam APBD Jawa Barat.

Tolak ukur meningkatnya kegiatan pembangunan suatu daerah dapat diamati dari realisasi pengeluaran pemerintah daerah, yang terdiri dari pengeluaran rutin dan pengeluaran pembangunan. Pengeluaran rutin terdiri dari belanja pegawai, belanja barang dan belanja operasional lainnya, sedangkan pengeluaran pembangunan terdiri dari pengeluaran untuk prasarana fisik dan lain-lain.

Realisasi Anggaran Pendapatan Pemerintah Daerah Propinsi Jawa Barat pada tahun anggaran 2003/2004, mencapai 3.264,48 milyar rupiah. Jenis penerimaan terbesar berasal dari Pendapatan Asli Daerah sebesar 66,49 persen, dimana pajak daerah merupakan kontributor terbesar. Sedangkan realisasi Anggaran Belanja Pemerintah Daerah Propinsi Jawa Barat sebesar 3.132,78 miliar rupiah. Jenis pengeluaran terbesar berasal dari Belanja

## 9.1 Regional Finance

*The Regional government revenue is one of main factor for development expenditure. Sources of regional revenue are local government original revenues and central government aid. With the limited of regional revenue, the central government aid such as balance fund was still dominant in Jawa Barat.*

*One indicator of regional development activity improvement can be observed from the realization of government expenditure which consists of routine and development expenditure. Routine expenditure consists of personnel expenditure, material expenditure and other operational expenditure, while development expenditure consists of physical infrastructure development expenditure and other expenditure.*

*The actual revenues of regional government of Jawa Barat province for fiscal year 2003/2004 reached 3 264.48 billion rupiahs. The most revenue came from local government original revenue which reached 66.49 percent, and the most contributor was the revenue from local tax. Moreover, the actual expenditures of regional government reached 3 132.78 billion rupiahs. The most spending was from share and financial aid expenditure and from civil*

Bagi Hasil dan Bantuan Keuangan dan Belanja Aparatur, masing-masing berjumlah 38,01 dan 31,17 persen.

Pada tahun anggaran 2003/2004 Jawa Barat mengalami defisit 131,7 milyar rupiah untuk pembiayaan, karena jumlah penerimaan daerah lebih kecil dari jumlah pengeluaran. Jumlah penerimaan sebesar 620,9 milyar rupiah dan jumlah pengeluaran sebesar 752,6 milyar rupiah. Penerimaan terbesar berasal dari sisa lebih perhitungan anggaran tahun lalu (76,93 persen), dan pengeluaran terbesar berasal dari sisa anggaran tahun berjalan (86,82 persen). Kabupaten Bandung dan kota Bandung adalah 2 daerah yang memiliki total pendapatan dan total penerimaan tertinggi di Jawa Barat.

## **9.2. Bank dan Koperasi**

Kontribusi Bank dalam pembangunan sangat signifikan dalam menggerakkan roda perekonomian. Bank sebagai lembaga finansial akan menarik dunia bisnis sebagai mitra untuk meningkatkan investasinya sehingga saling memperoleh keuntungan. Di lain pihak, secara makro akan meningkatkan Nilai Tambah Bruto.

Koperasi sebagai soko guru perekonomian nasional masih kurang

*servant expenditure for around 38.01 and 31.17 percent.*

*In fiscal year 2003/2004, Jawa Barat budget result in deficit 131.7 billions rupiah for financing. This was as a result of total regional expenditures was greater than total regional revenues. Total revenue was 620.9 billions rupiah, while total expenditure as 752.6 millions rupiah. The greatest revenue was from previous year surplus (76.93 percent), and the greatest expenditure was from current year surplus (86.82 percent). Bandung regency and Bandung city were the two area which had the greatest total revenue and total expenditure.*

## **9.2 Bank And Cooperation**

*Contribution of Bank in development is very significant to support economic wheel. Bank as financial Institution will attract business people as a partner to invest for both parties benefit. In addition, it will increase value added from this activity.*

*Cooperation as the leader in national economic is still neglected. Nevertheless, cooperation performance is gradually improved by the*

mendapat perhatian. Namun demikian, kinerja koperasi secara perlahan-lahan mulai di tata pemerintah agar dapat memberikan kesejahteraan anggotanya. Usaha tersebut terlihat dengan diperlakukannya koperasi sebagai salah satu badan yang dipersamakan dengan dunia usaha untuk bersaing, termasuk tender-tender dan kegiatan lainnya.

Jumlah koperasi di Jawa Barat pada tahun 2004 tercatat 18 895 buah, dengan jumlah terbanyak berada di kota Bandung dan kabupaten Bandung masing-masing sebanyak 2 196 dan 1 671.

### 9.3. Harga-harga

Dalam perekonomian faktor harga sangat menentukan, baik dunia bisnis maupun terhadap konsumen. Di dunia bisnis, harga akan mempengaruhi struktur biaya dan keuntungan. Berbeda dengan konsumen, harga akan mempengaruhi daya beli masyarakat. Perubahan harga makro dapat ditunjukkan oleh tingkat inflasi. Sedangkan inflasi yang tinggi akan membatasi gerak investor dan dipihak konsumen akan mengurangi daya beli dan kesejahteraan masyarakat. Berbeda dengan tingkat inflasi yang rendah akan merangsang dunia usaha untuk melakukan investasi dan bahkan dapat meningkatkan kesejahteraan konsumen.

*government in order to improve the member welfare. This effort can be seen from special treatment so that legal cooperation has same position with other establishment for competition include in pra qualification establishment participation and other activities.*

*In 2004, the number of Jawa Barat Cooperatives was 18 895. Bandung City and Bandung Regency had the most number which were 2 196 and 1 671 .*

### 9.3. Prices.

*Price factor in economic is very determine, not only in business world but also to consumer. In Business World, prices will affect cost structure and profit. While in consumer, prices will affect purchasing power of society. Inflation rate can be used as indicator of price's change. High inflation will prevent investor movement and in consumer side will decrease purchasing power and society welfare. The Lower inflation rate will enhance business world to invest so that it will improve consumer welfare.*

Secara umum perkembangan harga-harga beberapa jenis barang dan jasa pada tahun 2004 mengalami kenaikan. Namun tingkat inflasi di beberapa kota Jawa Barat tidak mencapai dua digit. yang menandakan harga-harga yang relatif cukup stabil dibandingkan tahun sebelumnya. Secara lengkap data tentang inflasi dan detail tentang faktor penunjang inflasi serta data lain yang berhubungan dapat dilihat pada Tabel 9.3.1 sampai dengan 9.3.7

#### **9.4. Nilai Kurs Rupiah**

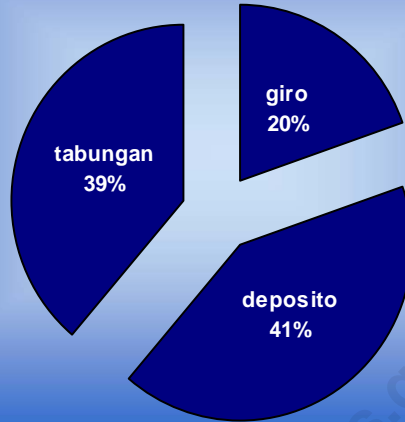

Nilai tukar rupiah terhadap dollar ( US \$) masih sangat fluktuatif. Kebijakan-kebijakan pemerintah dan isu-isu keamanan dan politik menjadi faktor utama penyebab turun naiknya nilai tukar rupiah terhadap dollar. Pemilu yang diadakan pada tahun 2004 juga sangat berpengaruh terhadap perubahan nilai tukar tersebut. Banyak pihak yang berspekulasi terhadap keadaan negara yang pada saat itu belum jelas. Nilai kurs beli terendah terdapat pada bulan Januari dan angka ini terus mengalami kenaikan sampai di akhir tahun. Data detail tentang nilai kurs rupiah terhadap mata uang asing per bulan dapat dilihat secara lengkap pada Tabel 9.4.1 sampai dengan Tabel 9.4.2.

*On general, the trend of commodities prices increased in 2004. However, inflation index in several Jawa Barat cities was not over 2 digits. It showed that prices are relatively stabil compared to last year. The complete inflation data and all the factors which contributes to it can be seen in table 9.3.1 up to 9.3.7*

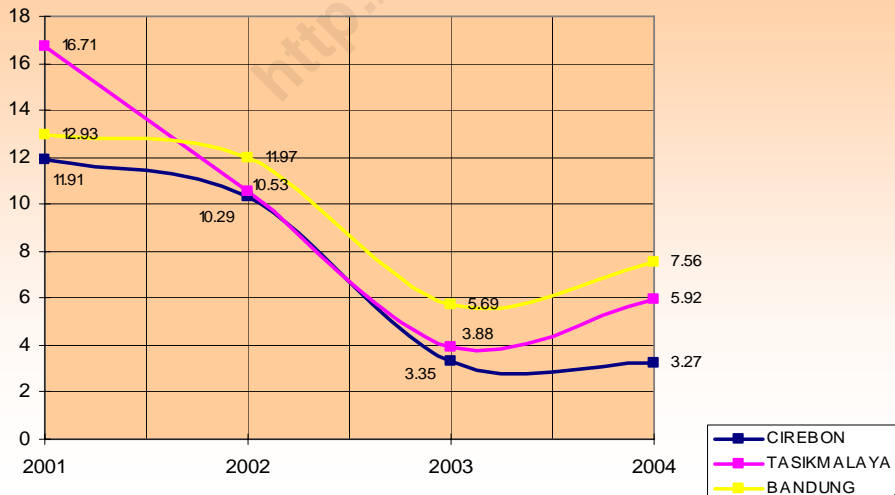

#### **9.4. Exchange Rates**

*Foreign exchange rates , especially dollar was fluctuatif toward rupiahs. Government regulation, security and political issue still became the the main cause of this fluctuation of the rupiah towards dollar. The general election which was held in 2004 also brought a big impact toward rupiah valus. The speculators tried to interfere since the national situation was so unpredictable. The lowest position of foreign exchange rate was in January, and the rate was continously increasing until the end of the year. The data of monthly exchange rate of rupiahs towards other currencies can be observed in Table 9.4.1 up to 9.4.2*

Besarnya pendapatan yang diperoleh/diterima rumah tangga dapat menggambarkan kesejahteraan suatu masyarakat. Namun demikian data pendapatan yang akurat sulit diperoleh, sehingga dalam survey/ kegiatan Sosial Ekonomi Daerah (Suseda) didekati melalui pengeluaran rumah tangga.

Pengeluaran rumah tangga dapat dibedakan menurut Pengeluaran Makanan dan Bukan Makanan, dimana menggambarkan bagaimana penduduk mengalokasikan kebutuhan rumah tangganya. Walaupun harga antar daerah berbeda, nilai pengeluaran rumah tangga masih dapat menunjukkan perbedaan tingkat kesejahteraan penduduk antar propinsi khususnya dilihat dari segi ekonomi.

Pengeluaran untuk konsumsi makanan dan bukan makanan berkaitan erat dengan tingkat pendapatan masyarakat. Di negara yang sedang berkembang, pemenuhan kebutuhan makanan masih menjadi merupakan prioritas utama, dikarenakan untuk memenuhi kebutuhan gizi.

*On general, the income of household can indicates the public welfare. On the other hand, getting accurate and up date data of household income is difficult. The Regional Socio Economic Survey of BPS-Statistics Indonesia activity method approaches through the household expenditure.*

*The household expenditures were classified into food consumption and non food consumption expenditure. It showed how the households allocate the expenditures according to their household needs. Although the price of interregional was different, the household expenditures can indicate the differences of population welfare stages, especially from the economic view.*

*The food consumption and non food consumption expenditure were closely related with the society income stage. In the developed countries, the consumption of food was getting the main priority as the nutrient fulfillment .*

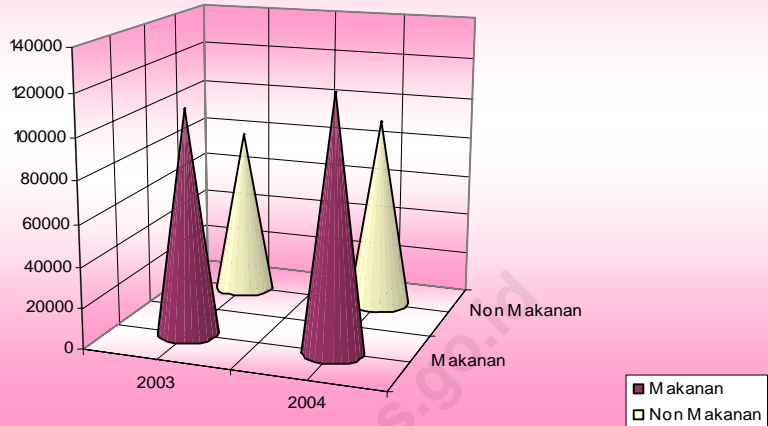

Pengeluaran rata-rata perkapita sebulan menurut kabupaten/kota di Jawa Barat pada tahun 2004 dapat dilihat pada Tabel 10.1. Dari tabel terlihat rata-rata pengeluaran perkapita sebulan menurut Jenis Pengeluaran yang paling tinggi ada di Kota Depok yaitu sebesar Rp. 408 077 disusul oleh Kota Bandung Rp. 357 688 dan Kota Bogor sebesar Rp. 300 052. Di Kota Depok dan Kota Bandung jenis pengeluaran terbesarnya adalah kelompok Bukan Makanan masing-masing 58.93 persen dan 54.75 persen, sedangkan di Kota Bogor pengeluaran terbesar muncul dari Kelompok Makanan yaitu sebesar 55.61 persen.

Bila dilihat secara keseluruhan pengeluaran rata-rata perkapita sebulan baik untuk Sub Golongan Makanan dan Bukan Makanan kemampuan tiap rumah tangga di Jawa Barat berada di kelompok pengeluaran Rp 20.000 sebulan. Untuk lebih jelasnya pengeluaran rata-rata perkapita sebulan menurut jenis komoditi dan persentasenya dapat dilihat pada Tabel 10.2 – 10.5.

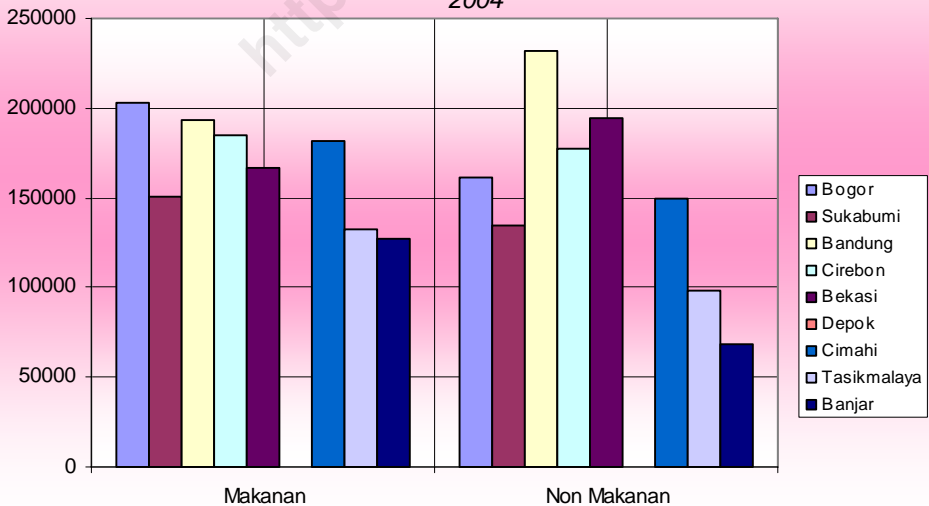

*Average per capita monthly expenditure for Regency/City in Jawa Barat in 2004 is presented in Table 10.1. The table shows that the highest average percapita monthly expenditures by commodity group mostly occurred in Depok city for 408 077 rupiahs, followed by Bandung city for 357 688 rupiahs and Bogor city for 300 052 rupiahs. In Depok and Bandung city, the highest expenditures occurred on Non Food Commodity Group for 58.93 and 54.74 percent. On the other hand, in Bogor city, the highest expenditures occurred on Food Commodity Group for 55.61 percent.*

Sumber : Survei Sosial Ekonomi Daerah - Badan Pusat Statistik Propinsi Jawa Barat  
Suuce : The 2004 Regional Socio - Economic Survey BPS Statistik of Jawa Barat

Pertumbuhan ekonomi Indonesia tahun 2004 semakin membaik dibanding tahun 2003. Berdasarkan perhitungan PDRB atas dasar harga konstan 2000, laju pertumbuhan ekonomi Jawa Barat sebesar 5,08 persen dan laju pertumbuhan tanpa migas sebesar 5,94 persen. Dari sembilan sektor yang ada pada PDRB, delapan sektor menghasilkan pertumbuhan yang positif. Sektor yang menghasilkan pertumbuhan ekonomi tertinggi adalah sektor jasa, bangunan/konstruksi dan pengangkutan dan komunikasi, yang besarnya di atas dua digit. Kenaikan tersebut masing-masing 16,75 persen, 10,31 persen dan 10,20 persen. Dilanjutkan oleh kenaikan yang lebih kecil terletak pada sektor listrik gas dan air bersih, perdagangan hotel dan restoran, pertanian, industri pengolahan, keuangan persewaan dan jasa. Kenaikan tersebut masing-masing 8,65 persen, 6,63 persen, 5,98 persen, dan 2,69 persen. Yang terakhir adalah sektor pertambangan dan penggalan dengan angka kenaikan negatif 3,71 persen.

Nilai PDRB Jawa Barat tahun 2003 atas dasar harga berlaku sebesar 270 695 000 milyar rupiah dan tanpa migas sebesar 252 038 314 milyar rupiah. Tahun 2004 diperkirakan mengalami peningkatan menjadi 305 305 606 milyar rupiah dan tanpa migas 281 720 969 milyar rupiah. Jika dibandingkan tahun sebelumnya, PDRB mengalami

*For the year 2004, growth of Jawa Barat economy showed a better performance than 2003. The growth rate of gross regional domestic product (GRDP) based on Constant 2000 market prices for Jawa Barat was 5.08 percent, while growth of non-oil GRDP was 5.94 percent. From nine sector of economy, which composes GRDP, eight sectors produced a positive growth. The highest growth was reached by service sector, construction and transport and communication sector, while the percentage increased by two digit number. The percentages were 16.75 percent, 10.31 percent and 10.20 percent consecutively. A smaller number of increase happened in electricity gas and water supply, trade hotel and restaurant, agriculture, manufacturing industry, and finance dwelling and business service. The percentages were 8.65 percent, 6.63 percent, 5.98 percent, and 2.69 percent consecutively. Mining and quarrying sector reached the negative figure negative 3.71 percent.*

*GRDP of Jawa Barat at current prices in 2003, reached 270 695 000 billion rupiahs, while the value of non oil GRDP was 252 038 314 billion rupiahs. In 2004, GRDP increased 305 305 606 billion rupiahs, and the value non oil was 281 720 696 billion rupiahs. Compared to the previous year, it increased*

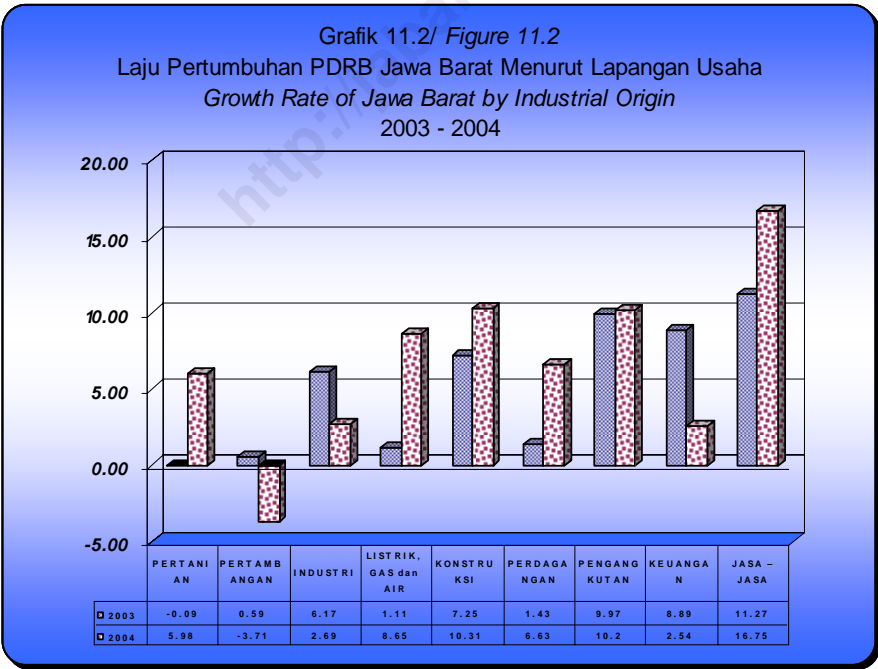

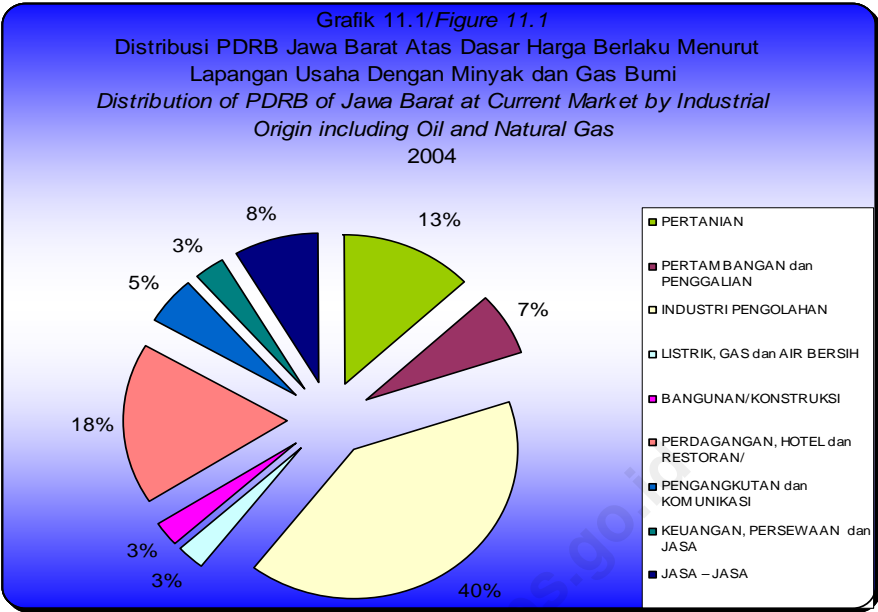

peningkatan masing-masing sebesar 12,79 persen dengan minyak dan gas bumi, dan 11,78 persen tanpa minyak dan gas.

Untuk kontribusi PDRB, sektor yang paling banyak memberikan persentase kontribusi terhadap total PDRB 2004 adalah sektor industri pengolahan, sektor perdagangan hotel dan restoran, sektor pertanian, sektor jasa-jasa, sektor pertambangan dan penggalian, sektor pengangkutan dan komunikasi, sektor pengangkutan dan komunikasi, sektor keuangan persewaan dan jasa, bangunan/konstruksi, dan terakhir sektor listrik gas dan air bersih.

*for 12.79 percent, and 11.78 percent for non oil.*

*For the contribution for the total 2004 GRDP, the most contribution is given by manufacturing industry, followed by trade hotel and restaurant, agriculture sector, service, mining and quarrying, transport and communication, finance dwelling and business service, and electricity gas and water supply for the least.*

Catatan /Notes : \*) Angka Diperbaiki / Revised Figures

\*\*) Angka Sementara / Preliminary Figures

Pembangunan di berbagai daerah dapat diukur dengan mengamati beberapa indikator baik dibidang sosial maupun bidang ekonomi. Dengan menyajikan berbagai data tersebut diharapkan dapat membandingkan kemajuan yang telah dicapai dan tingkat kesejahteraan masyarakat oleh masing-masing daerah di Indonesia.

Bahan makanan pokok masyarakat Indonesia sampai saat ini masih bersumber dari padi. Tanaman ini di tanam di seluruh tanah air. Luas panen padi pada periode 2003-2004 mengalami sedikit kenaikan dari 11,48 juta Ha pada tahun 2003 menjadi 12,03 juta Ha pada tahun 2004.

Bila dibandingkan daerah lain, Propinsi Jawa Barat memberikan kontribusi terbesar dari luas panen padi yaitu 15,3 persen. Jawa Timur sebagai propinsi terbesar kedua untuk luas panen dengan kontribusi sebesar 14,1 persen yang pada tahun sebelumnya menduduki peringkat 1. Dengan demikian Jawa Barat merupakan daerah potensi sebagai penyangga pangan di tanah air, penghasil beras terbanyak yang memiliki kontribusi hampir mencapai 17,32 persen dari total Indonesia. Angka tersebut mengalami sedikit kenaikan dibanding tahun yang lalu sebesar 17 persen

*Many indicators in socio and economic can be used to measure the development progress in many region. By presenting this data, It is hoped it can be used to compare development progress with respect to society welfare level that has been reached by each region in Indonesia.*

*A particular foodstuff resource of Indonesian people until now is still from rice. These food crops almost planted in every province in Indonesia. In period 2003-2004, harvested area increased slightly from 11.48 million hectares in year 2003 up to 12.03 million hectares in year 2004.*

*Nevertheless, compared to other region, the harvested area in province of West Java contributed the most for about 15.3 percent. The second largest contributor was East Java for about 14.1 percent, even though this province was in the first position last year. It is a proof that this region is still an area for food stock in this country. West Java is the largest contributor almost reached 17.32 percent out of the total national production. There was a slight increase compared to last year production which was 17 percent.*

Salah satu indikator makro ekonomi yang mendapat perhatian serius dari pemerintah adalah tingkat perubahan harga atau inflasi. Tingkat inflasi yang relatif stabil atau rendah, bukan saja dapat meningkatkan Purchasing Power masyarakat, tetapi juga akan menguntungkan pengusaha atau produsen karena meningkatnya produksi akibat bertambahnya permintaan.

Inflasi nasional pada tahun 2004 mengalami kenaikan yakni 6,40 persen dibandingkan tahun 2003 yang hanya mencapai 5,06 persen. Inflasi yang terjadi pada tahun 2004 tertinggi di Jayapura, yaitu sebesar 9,45 persen. Sedangkan terendah terjadi di Cirebon yaitu 3,27 persen.

Indikator harga di Jawa Barat yang digunakan adalah inflasi di tiga kota yaitu Kabupaten Tasikmalaya, Cirebon dan Kota Bandung. Inflasi Kota Bandung tahun 2004 memperlihatkan angka yang lebih besar dari angka nasional yaitu 7,56 persen.

Upah Minimum Propinsi (UMP) untuk total 30 daerah di Indonesia, Propinsi Papua memiliki nilai tertinggi diikuti Sulawesi Selatan dan yang terkecil dimiliki oleh Propinsi Yogyakarta. UMP Propinsi Jawa Barat sedikit lebih besar dari UMP rata-rata nasional.

*One of macro economic indicator that has seriously government attention is price change level or inflation. Inflation rate that has relatively stable or low is not only able to increase purchasing power society but also able to give advantage to entrepreneur or producer since increased production is a result of added demand.*

*In 2004 the national inflation rate was 6.40 percent. The rate increased compare to 2003 which was only 5.06. The highest rate occurred in the city of Jayapura that reached 9.45 percent, while the lowest rate occurred in the city of Cirebon which only reached 3.27 percent.*

*Price indicator used in Jawa Barat was inflation rate in three cities, such as Tasikmalaya, Cirebon and Bandung. In 2004, the inflation figure of Bandung city is more than national figure which was 7.56 percent.*

*For National Regional Minimum Wages, the province of Papua has the highest rate, followed by South Sulawesi, and the lowest rate belongs to the province of Banten. In addition, Jawa Barat rate is slightly higher than national rate.*

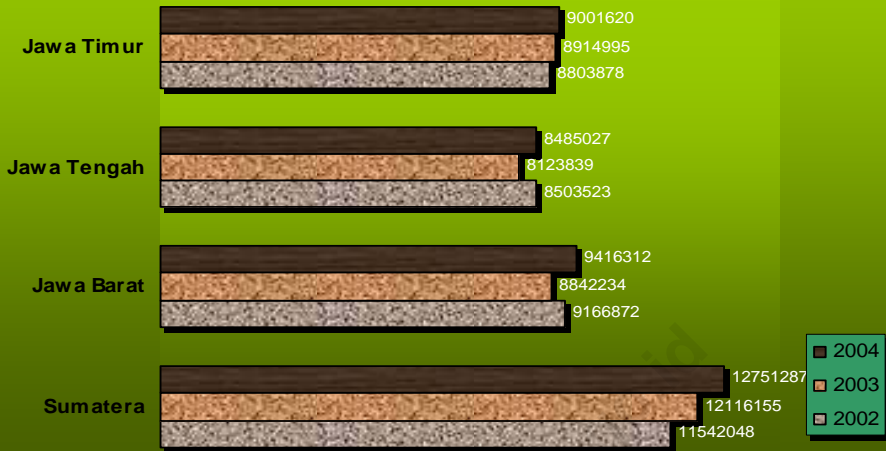

Penduduk Jawa Barat, tahun 2004 berjumlah 37 545 ribu jiwa atau sekitar 17,35 persen dari penduduk Indonesia. Hal ini menempatkan Jawa Barat pada urutan pertama dari propinsi-propinsi di Indonesia, diikuti Propinsi Jawa Timur pada urutan kedua dan Jawa Tengah pada urutan ketiga

Dilihat dari kepadatan penduduk, Jawa Barat merupakan Propinsi terpadat ke-2 setelah Propinsi DKI Jakarta. Kemudian dilanjutkan oleh Jawa Tengah dan DI Yogyakarta. Kepadatan penduduk terkecil masih terjadi di propinsi Papua. Sementara itu, laju pertumbuhan penduduk terbesar terjadi di propinsi Papua, dan terkecil di propinsi DI Yogyakarta.

*In year to 2004, the number of Jawa Barat population was 37 545 million peoples or about 17.35 percent from Indonesian population. It positioned Jawa Barat Province on the first rank of most populated provinces in Indonesia, followed by Jawa Timur Province, and Central Jawa Province.*

*As we seen from population density, Jawa Barat Province is the second most populated province after DKI-Jakarta. It was followed by DI-Yogyakarta and Central Java Province. Papua province had the lowest population density. In addition, Papua province has the highest annual growth rate of population while the DI Yogyakarta had the lowest rate.*
